**Marc E. Gold of
Manko, Gold, Katcher & Fox, LLP, to
Speak at the Fall Conference of the Delaware Section of the American
Water Resources Association and the Water Resources Association
of the Delaware River Basin**

November 12, 2014

Philadelphia, PA (October 27, 2014) – Marc E. Gold, a partner with the environmental, energy and land use law and litigation firm of Manko, Gold, Katcher & Fox, LLP (“MGKF”), will speak at the Fall Conference of the Delaware Section of the American Water Resources Association and the Water Resources Association of the Delaware River Basin. The program, “A Tale of Three Estuaries: Diverse Regional Strategies for Water Resource Management”, will take place on November 12, 2014 from 9 a.m. to 5 p.m. in Clayton Hall at the University of Delaware. Gold’s presentation will take place from 11:15 to noon and focus on the innovative regulatory approaches for water quality improvement developed as part of the PCB TMDLs [Polychlorinated Biphenyl (PCB) Total Maximum Daily Loads (TMDLs)] established by EPA for the Delaware Estuary. MGKF is also a sponsor of the symposium.

Marc, a founding partner of MGKF, represents a wide array of diverse clients on issues related to environmental regulatory compliance and permitting, particularly in the areas of water pollution control, solid waste management, site development, environmental due diligence, and the requirements applicable to the natural gas industry in Pennsylvania. Building on his experience at the Environmental Protection Agency, Region 3, Marc has focused his practice on representing industrial clients.

More recently, Marc has focused his efforts on water regulation, including the TMDL program, where he is representing a coalition of industrial and municipal dischargers within the Delaware Estuary. This representation has enabled him to expand his practice before the Delaware River Basin Commission.

Marc's practice has also expanded into environmental and energy issues spawned by the discovery of the Marcellus Shale formation and the emerging natural gas development activities in Pennsylvania. He serves as the firm's principal liaison with the Marcellus Shale Coalition.

MGKF concentrates its practice in environmental, energy, and land use law and litigation. It represents clients ranging from Fortune 100 corporations to small, privately held enterprises, both in the Mid-Atlantic region and on a national basis. For the tenth consecutive year, MGKF has been listed in the top tier for environmental law in Chambers USA—America's Leading Lawyers for Business. Offices are located at: 401 City Avenue, Suite 901, Bala Cynwyd, Pennsylvania; 535 Route 38, Suite 145A, Cherry Hill, New Jersey; and at 25 West Third Street, Suite 303, Williamsport, Pennsylvania.
