**Brett Slensky and Michael C. Nines of  
Manko, Gold, Katcher & Fox, LLP Presented a Lecture on  
“Green Stormwater Infrastructure”  
at the Overbrook Environmental Education Center**

(Philadelphia, PA – April 30, 2015) – Brett Slensky, an attorney with Manko, Gold, Katcher & Fox, LLP (MGKF), the environmental, energy and land use law and litigation firm based just outside of Philadelphia, PA, teamed up with in-house technical consultant Michael Nines, PE, LEED AP, to present “Green Stormwater Infrastructure—Rainwater: Where Does It Go?”. The program took place on Thursday, April 23 at the Overbrook Environmental Education Center (OEEC) as part of a training series that OEEC is putting on in cooperation with the Philadelphia Water Department. It was an interactive presentation with hands-on activities built in for the high school students also in attendance. Some of the topics covered included point source and non-point source pollution, stormwater runoff and wastewater treatment.

Slensky concentrates his practice on the environmental aspects of commercial transactions, property development issues, regulatory compliance and renewable energy. In the transactional context, he advises clients on a range of due diligence and permitting issues, applicable state and federal liability protections, and the negotiation and structure of the pertinent deal documents. In the regulatory compliance area, Brett assists clients to meet their particular environmental compliance objectives, including the implementation of practical management strategies and programs for one or multiple facilities, addressing discrete issues that may arise in connection with daily operations, and proactive management of enforcement and business risks.

A licensed professional engineer, Nines has over 16 years of diverse environmental engineering experience gained through previous employment in the manufacturing sector, environmental consulting, and with an international chemical manufacturing trade association. His experiences have enabled him to excel in complex multi-media environmental problem solving through "real-world" experiences in the manufacturing, production, retail, and real estate sectors. He values understanding the intricacies of many client's complex manufacturing facilities, development projects, and related technologies in order to fully comprehend relevant regulatory concerns while maintaining a corporate management perspective to problem solving.

*MGKF concentrates its practice in environmental, energy, and land use law and litigation. It represents clients ranging from Fortune 100 corporations to small, privately held enterprises, both in the Mid-Atlantic region and on a national basis. Offices are located at: 401 City Avenue, Suite 901, Bala Cynwyd, Pennsylvania; 535 Route 38, Suite 145A, Cherry Hill, New Jersey; and at 25 West Third Street, Suite 303, Williamsport, Pennsylvania.
