Partners Bart Cassidy, Michael Meloy and Rodd Bender of Manko, Gold, Katcher & Fox, LLP Presented at Pennsylvania Chamber of Business and Industry 2016 Annual Environmental Conference

Philadelphia, PA (May 2, 2016) – Manko, Gold, Katcher & Fox (MGKF) partners Bart Cassidy, Michael Meloy and Rodd Bender presented at the 2016 Annual Environmental Conference of the Pennsylvania Chamber of Business and Industry in Lancaster, Pennsylvania on April 13, 2016. Cassidy's panel on Air Compliance touched upon a variety of compliance issues and enforcement initiatives and included: PA's RACT II program, revised ozone NAAQs, SO₂ attainment standards, CO₂ emission regulations, Title V permits, state air quality regulations, as well as new developments in federal air quality regulations, including relative to MACT standards and startup and shutdown scenarios.

Meloy and Bender teamed up to provide an in-depth presentation on requirements for residual and hazardous waste generators in Pennsylvania. This program helped attendees gain a better understanding of what materials qualify as wastes, when recycled materials do not qualify as wastes, what types of requirements apply to hazardous and waste generators (including the various forms that residual waste generators must complete), recent significant proposed changes in the hazardous waste generator requirements, and particular requirements relating to clean fill, waste oil, electronic waste, and the oil and gas industry.

Cassidy leads the firm's air quality/complex industry regulatory practice group. Although his client-base is diverse, he primarily focuses on complex regulated industries, notably including the electric generating, petroleum refining, chemical processing, metal manufacturing and waste management industries. He has

provided local, regional and national support to his clients, particularly in the complicated realm of air quality compliance.

Meloy has more than 30 years of experience in the environmental arena and brings both a legal and engineering background to bear in representing a wide array of clients in environmental litigation, regulatory compliance, and transactional matters. He has provided regulatory assistance and advice to businesses in connection with all of the major environmental regulatory programs, handled the environmental aspects of complex real estate and corporate transactions, been actively involved in numerous redevelopment and remediation projects around the world, handled environmental litigation in both the federal and state courts and before administrative tribunals, and helped design and implement environmental auditing and compliance management programs.

Bender has concentrated on brownfield transactions and compliance counseling across a variety of regulatory programs since joining the firm in 1997. He has extensive experience structuring environmental due diligence for real estate and business transactions, negotiating environmental provisions in transactional documents, and advising developers on satisfying state and federal cleanup programs and property transfer laws consistent with business objectives.

MGKF concentrates its practice in environmental, energy, litigation, safety, and land use law. It represents clients ranging from Fortune 100 corporations to small, privately held enterprises, both in the Mid-Atlantic region and on a national basis. For the 12th consecutive year, MGKF has been listed in the top tier for environmental law in Chambers USA—America's Leading Lawyers for Business. Offices are located at: 401 City Avenue, Suite 901, Bala Cynwyd, Pennsylvania; 535 Route 38, Suite 145A, Cherry Hill, New Jersey; and at 25 West Third Street, Suite 303, Williamsport, Pennsylvania.
