AN ENVIRONMENTAL AND ENERGY LAW PRACTICE

# “Don’t Brush Off the New Lead Paint Rules”

## The New EPA Lead Paint Regulations: How Will They Affect You?

June 23, 2010

### When:

Wednesday, June 23, 2010

8:30 a.m. breakfast  
9:00-11:00 a.m. program

W V W

### Where:

Manko, Gold, Katcher & Fox  
401 City Ave., Ste. 500  
Bala Cynwyd, PA 19004  
(484) 430-5700

### Directions

Complimentary parking available.

W V W

### Brought to you by:

[ALC Environmental](#) and  
[Manko, Gold, Katcher & Fox](#)

### Questions?

Feel free to contact  
MGKF’s Julie Hayes  
at 484-430-2352 or  
[jhayes@mgkflaw.com](mailto:jhayes@mgkflaw.com)

**We look forward to seeing  
you on June 23.**

The "Renovation, Repair, & Painting Rule" is now in effect and imposes significant requirements anytime a painted surface is disturbed (sanding, demolition, renovation, repair, etc.) in pre-1978 housing ("target housing") and child occupied facilities. The rule fundamentally changes the way property managers, renovation and remodeling contractors, maintenance workers, painters and other specialty trades do business in structures built before 1978. Don't rest this responsibility on your workers. It is critical that top managers understand the nuances of the new laws to avoid stiff fines and penalties for non-compliance. **CLE credits are pending.**

Extensive new training and certification requirements exist. Property managers and owners should be diligent in assuring their building staff and outside contractors thoroughly understand their obligations under the new EPA rule which include the following requirements: new training, work practices, clearances, and expanded record-keeping, as well as additional notifications and disclosures. It is important that everyone involved clearly understands the legal ramifications and potential penalties surrounding the lead paint laws and regulations.

### Panelists include:

- Josh Sarett  
President, ALC Environmental
- Michael C. Gross, Esq.  
Partner at MGKF
